

# **MinEx health and safety incident statistics**

## **Q3 2025 – July to September**

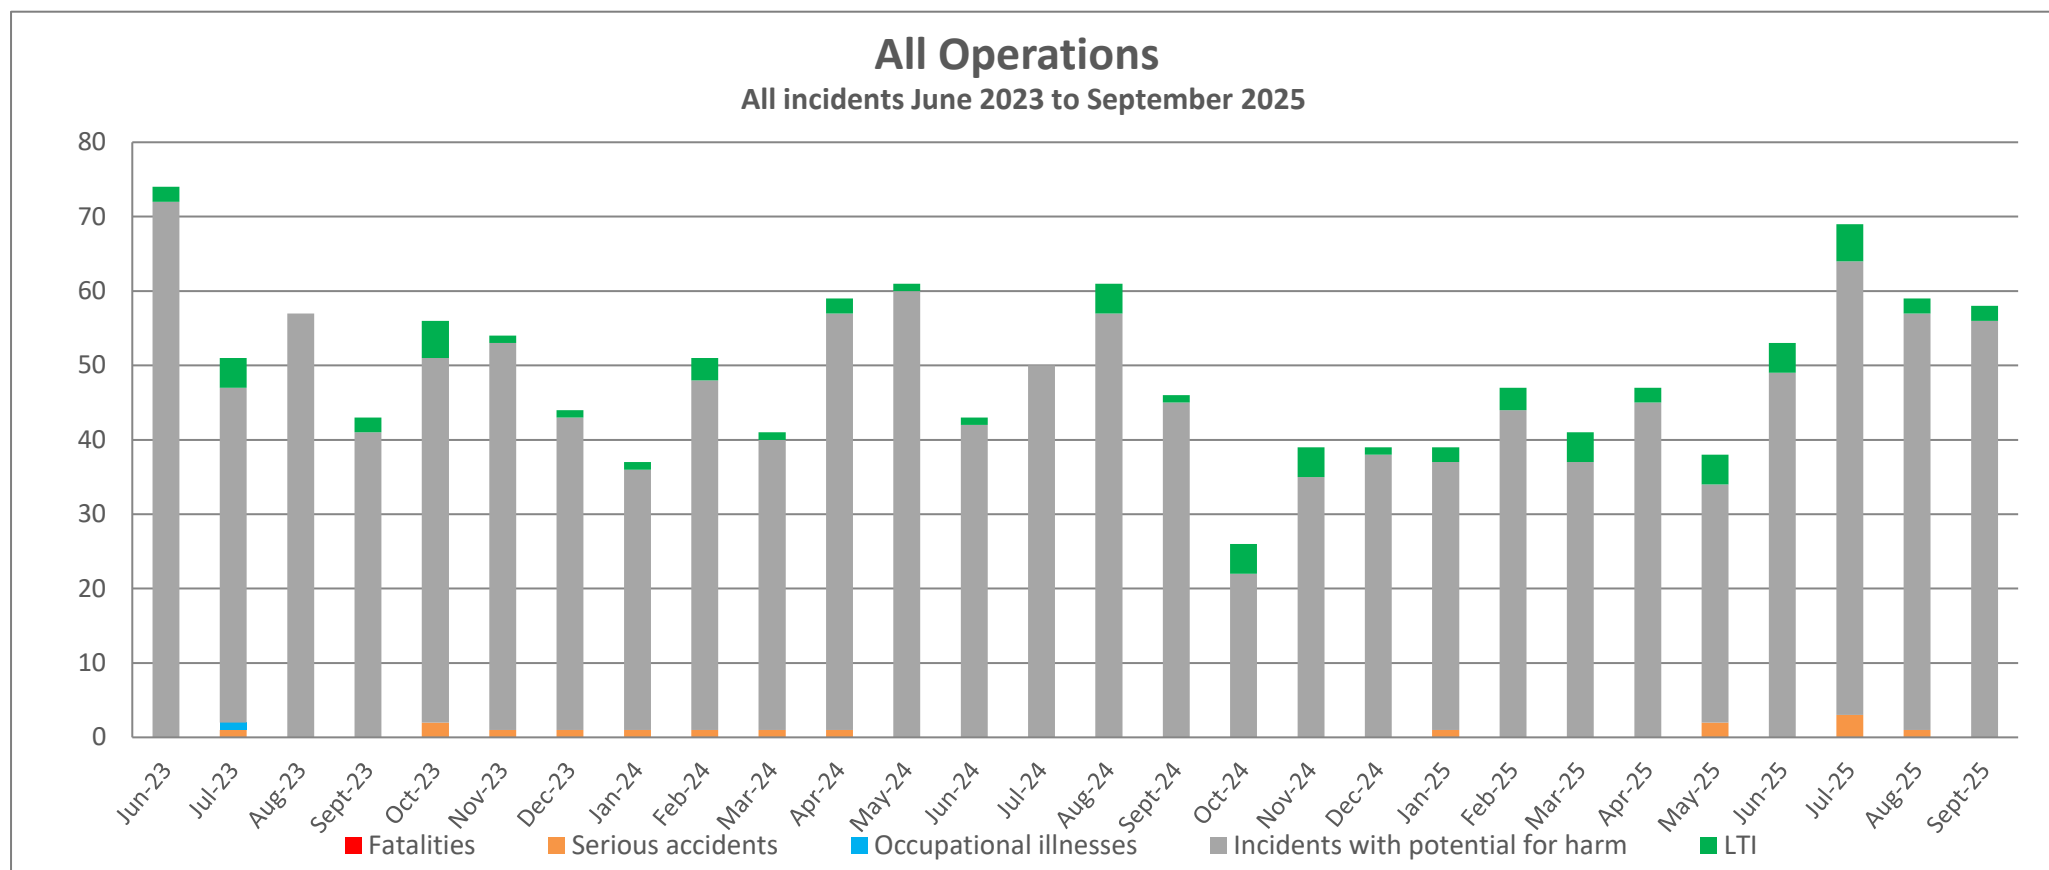

## Definitions

<b>Collision</b>	Includes: <ul style="list-style-type: none"> <li>• Vehicle collision</li> <li>• Loss of control of a vehicle (any incident involving vehicle other than collision)</li> <li>• Person hit by a vehicle</li> </ul>
<b>Entanglement</b>	Includes: <ul style="list-style-type: none"> <li>• Person caught/injured in plant (conveyors, drive belts, crush injury)</li> <li>• Injuries from plant (laceration, pinched finger)</li> </ul>
<b>Environmental</b>	Includes ventilation, gas, dust, noise.
<b>Falls</b>	Includes: <ul style="list-style-type: none"> <li>• Fall of ground (rockfall, stockpile collapse, ground movement)</li> <li>• Fall of equipment (tool, plant, other object)</li> <li>• Fall of person (slips, trips, falls, bumps)</li> </ul>
<b>Fatality</b>	A fatality is a death resulting from an incident of hazardous exposure involving work, regardless of the time intervening between injury and death.
<b>Hazardous substances</b>	Worker exposure to hazardous substances.
<b>Hours worked</b>	The total number of hours worked including overtime and training but excluding leave, sickness and other absences. Used to calculate incident rate.
<b>Incident with potential for harm</b>	An incident that, under different circumstances, might easily have resulted in a serious injury, fatality or catastrophic loss.
<b>Lost Time Injury (LTI)</b>	Lost time injury or occupational illness resulting in an inability to work on the next rostered day or shift subsequent to the injury occurring.
<b>Medical Treatment (MTI)</b>	A work-related injury or occupational illness that is not an LTI and which results in injury or illness that requires medical treatment at a higher level than first aid, generally from a doctor or a related professional such as a physiotherapist.
<b>Occupational illness</b>	An occupational illness is any work-related abnormal condition or disorder, other than one resulting from a work injury, caused by or mainly caused by exposures at work which results in an adverse reaction within a body system.
<b>Occupational injuries</b>	Minor injuries from work activity including cuts, bruises, sprains etc.
<b>Release of pressure</b>	Includes: <ul style="list-style-type: none"> <li>• Uncontrolled electrical incident (isolation breach, electric shock)</li> <li>• Uncontrolled hydraulic pressure event</li> <li>• Uncontrolled explosive event (misfire, blast-related issue)</li> </ul>
<b>Rounding</b>	The segments have been rounded to the first decimal point.
<b>Serious accident</b>	A serious accident is an incident which results in admittance to hospital for treatment.
<b>TRIFR</b>	Total Recordable Incident Frequency Rate (TRIFR). TRIFR rate is the rate of recordable injuries that occur per million hours worked. TRIFR is calculated as the number of Lost Time Injuries + Significant Injuries Restricted Work.

## TRIFR data: All operations – 2 years to current quarter

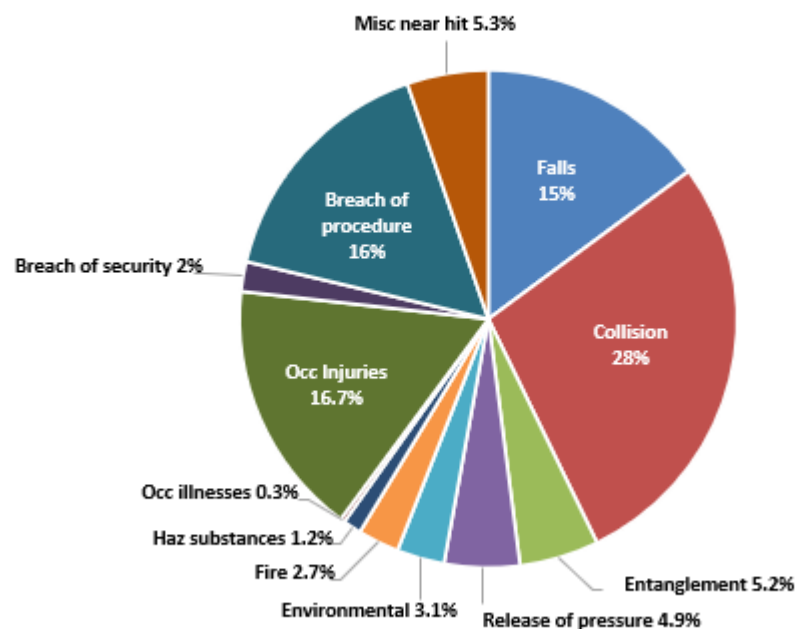

## All incidents: All operations – by category (including potentials/near hits) 2 years to current quarter

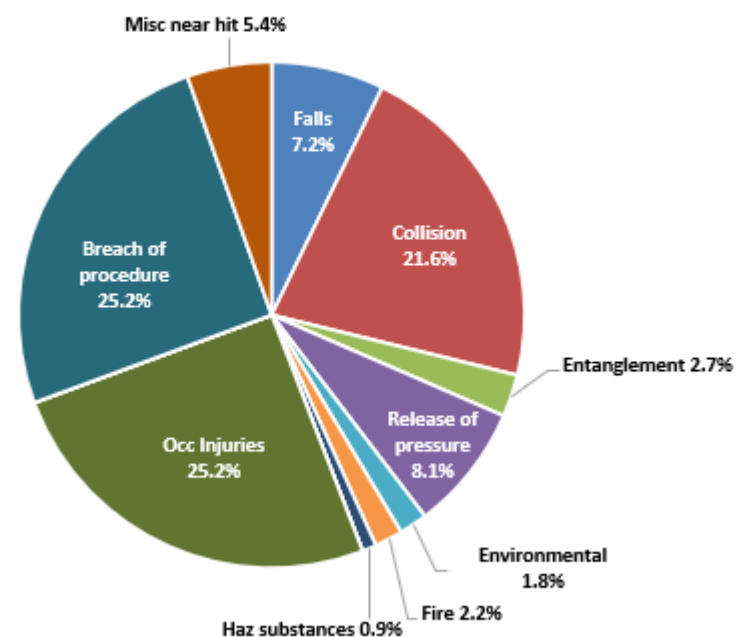

## Incident breakdown: All operations – by category (including potentials/near hits)

**All Operations - All Incidents  
July 2017 to September 2025**

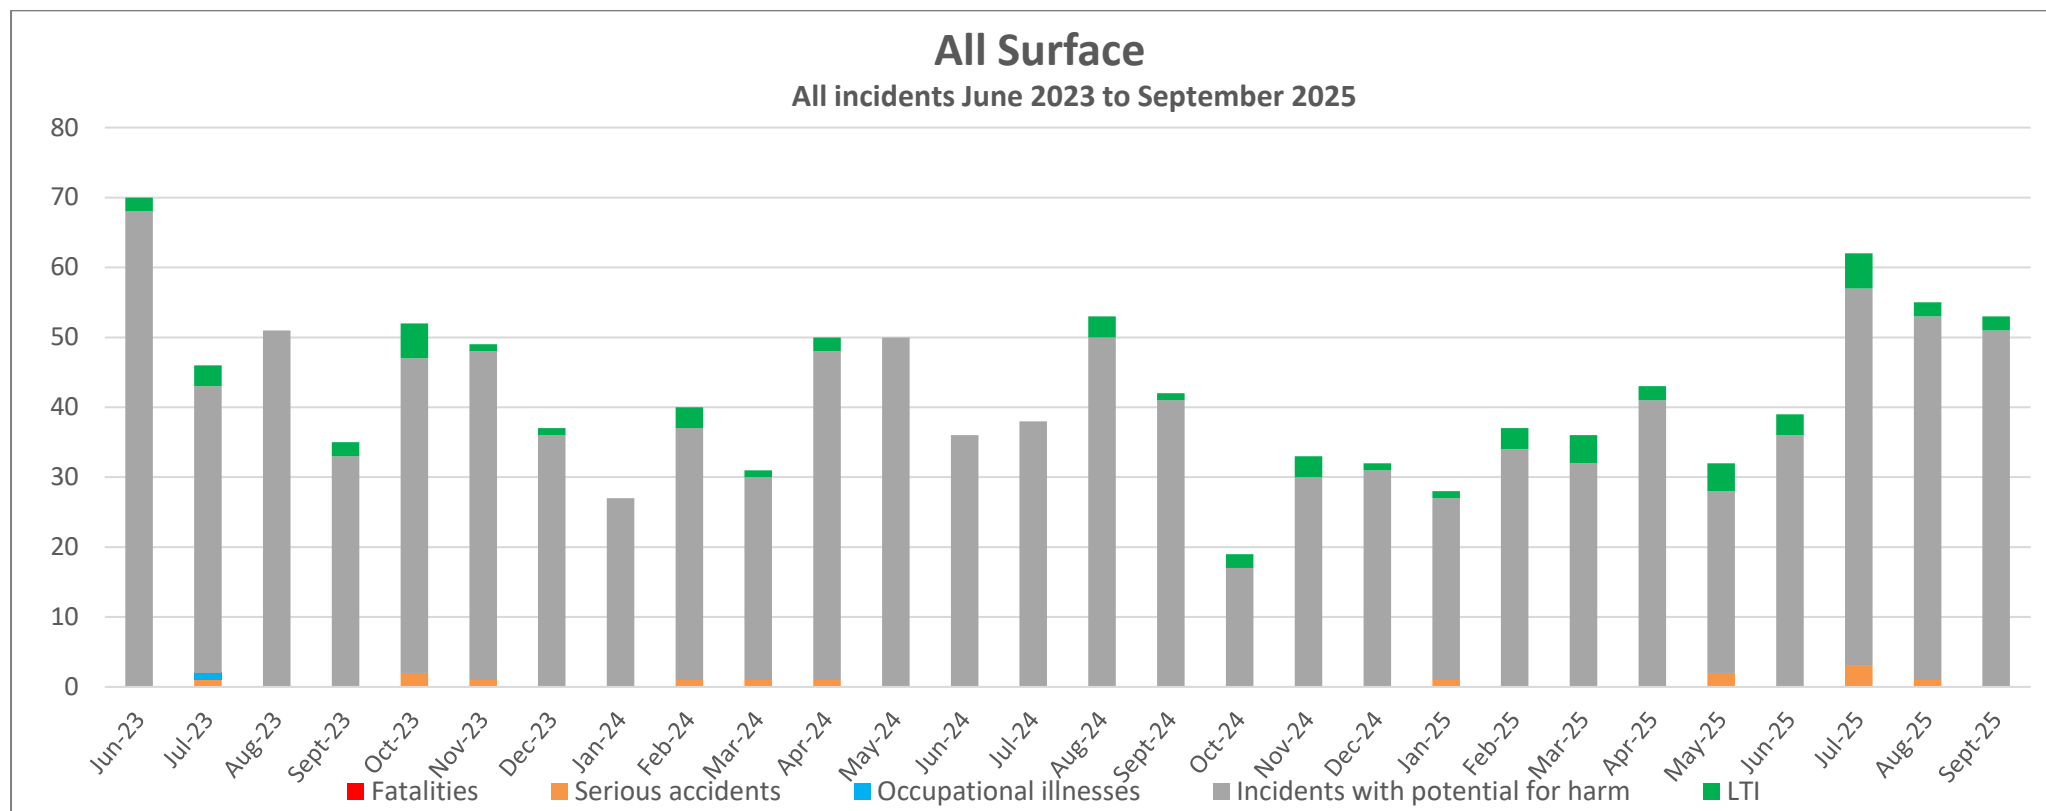

**All Operations - All Incidents  
Q3 July to September 2025**

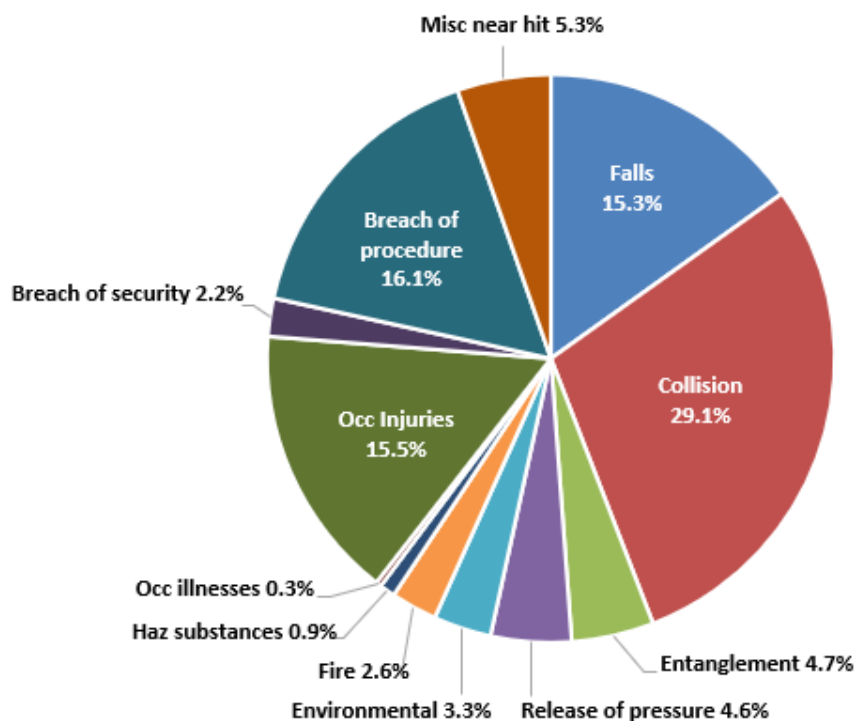

## All incidents: All surface – by category (including potentials/near hits)

2 years to current quarter

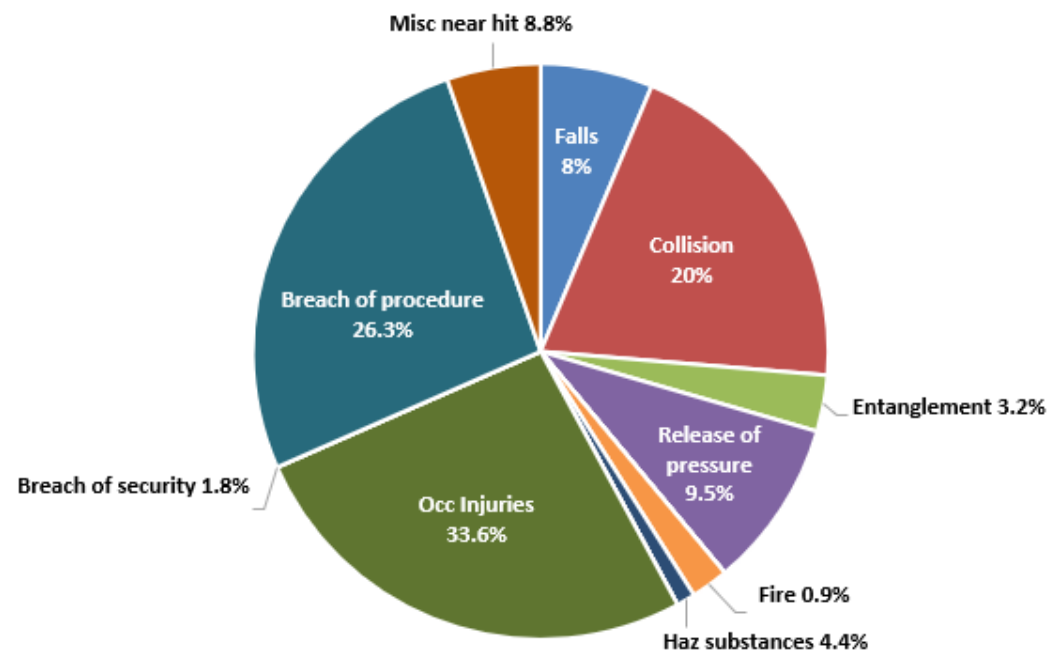

## Incident breakdown: All surface – by category (including potentials/near hits)

**All Surface - All Incidents  
July 2017 to September 2025**

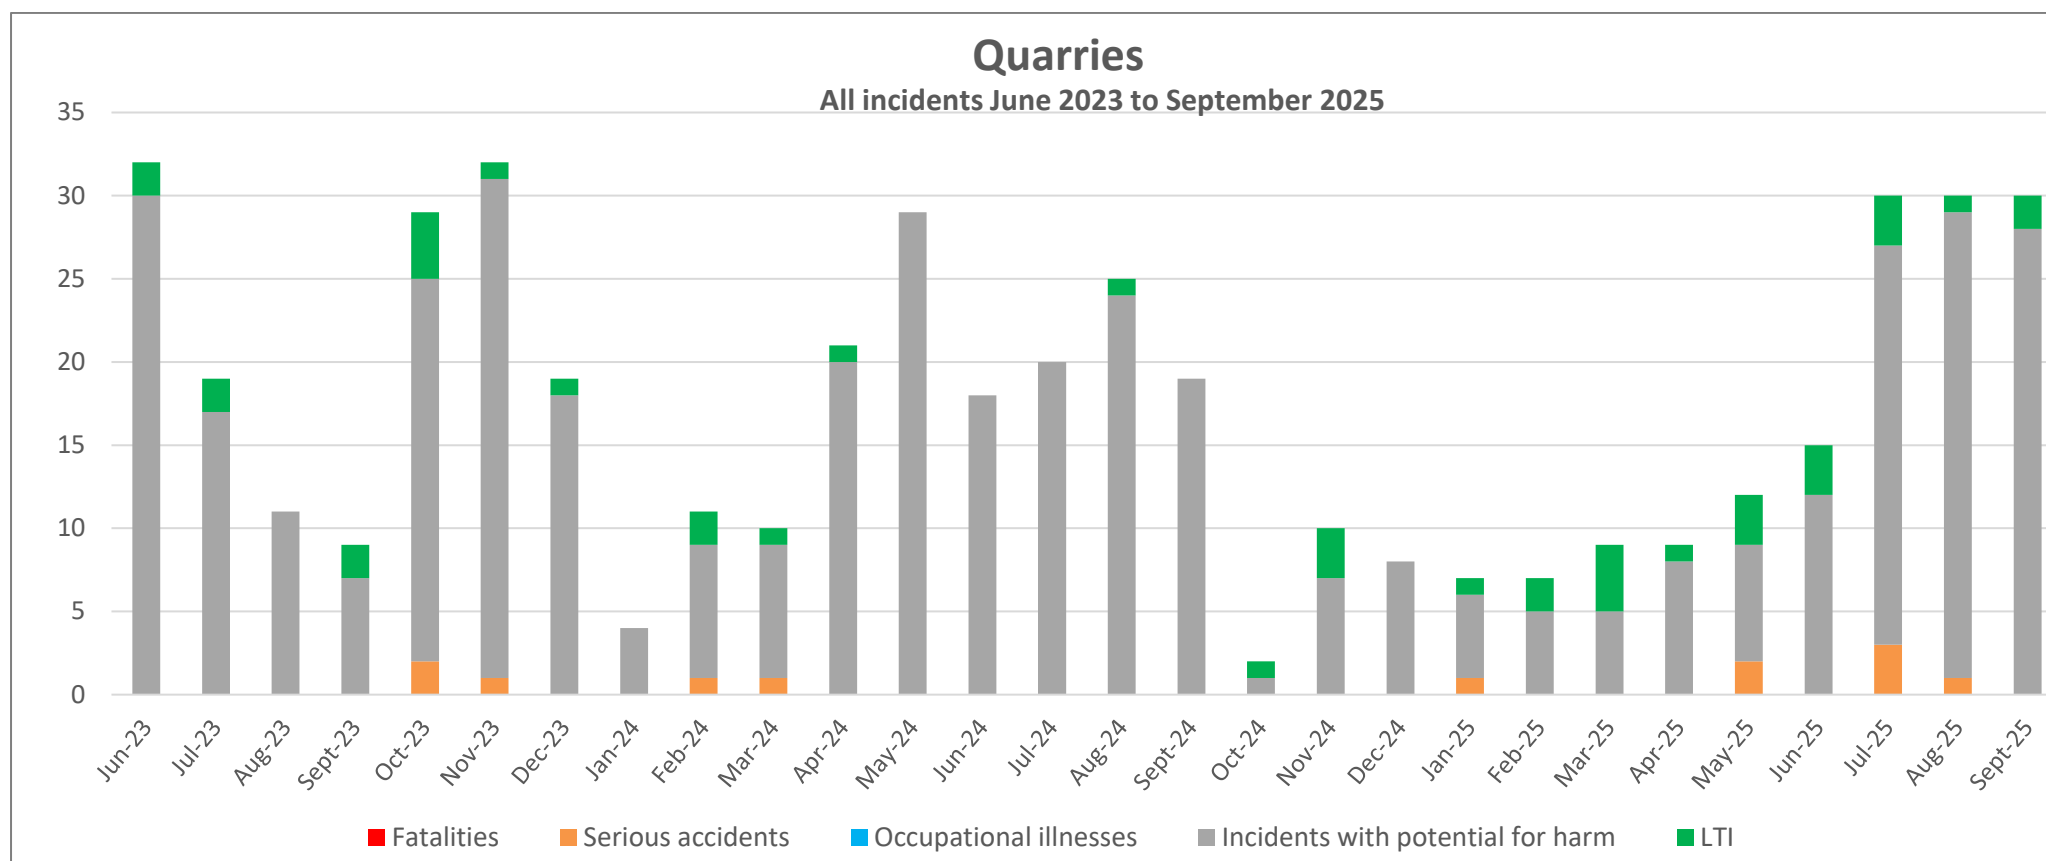

**All Surface - All Incidents  
Q3 July to September 2025**

## All incidents: Quarries – by category (including potentials/near hits)

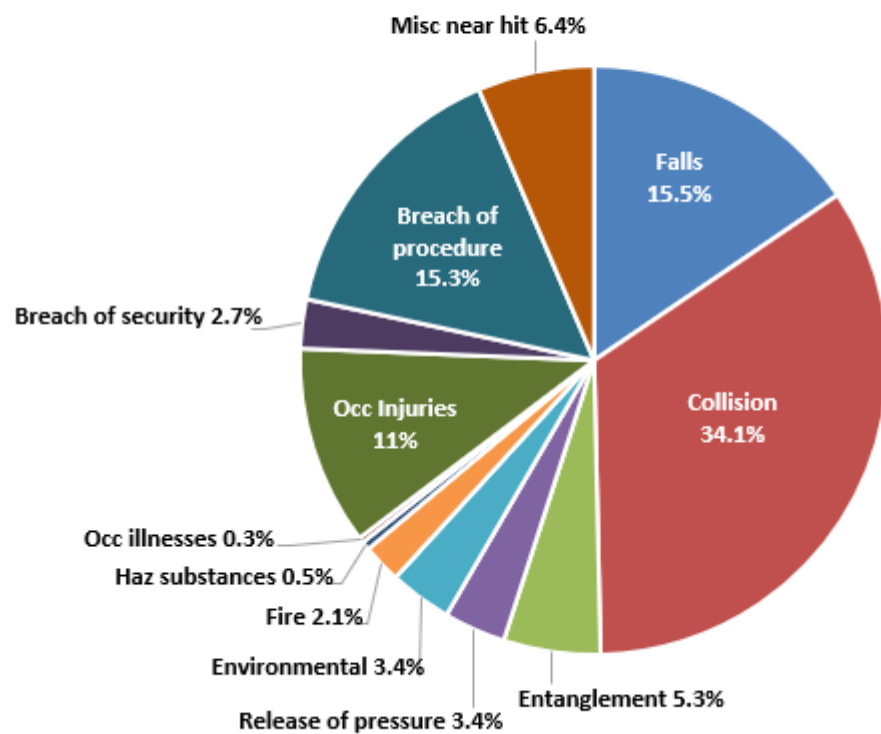

2 years to current quarter

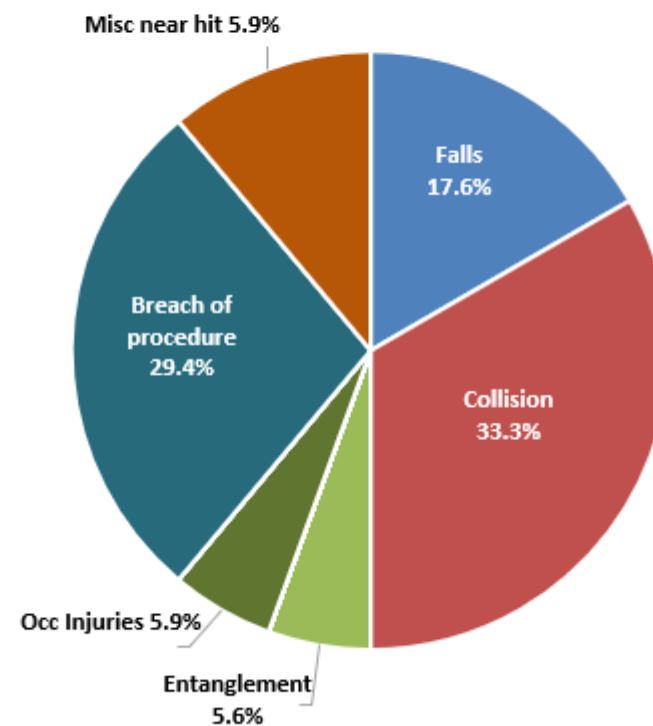

## Incident breakdown: Quarries – by category (including potentials/near hits)

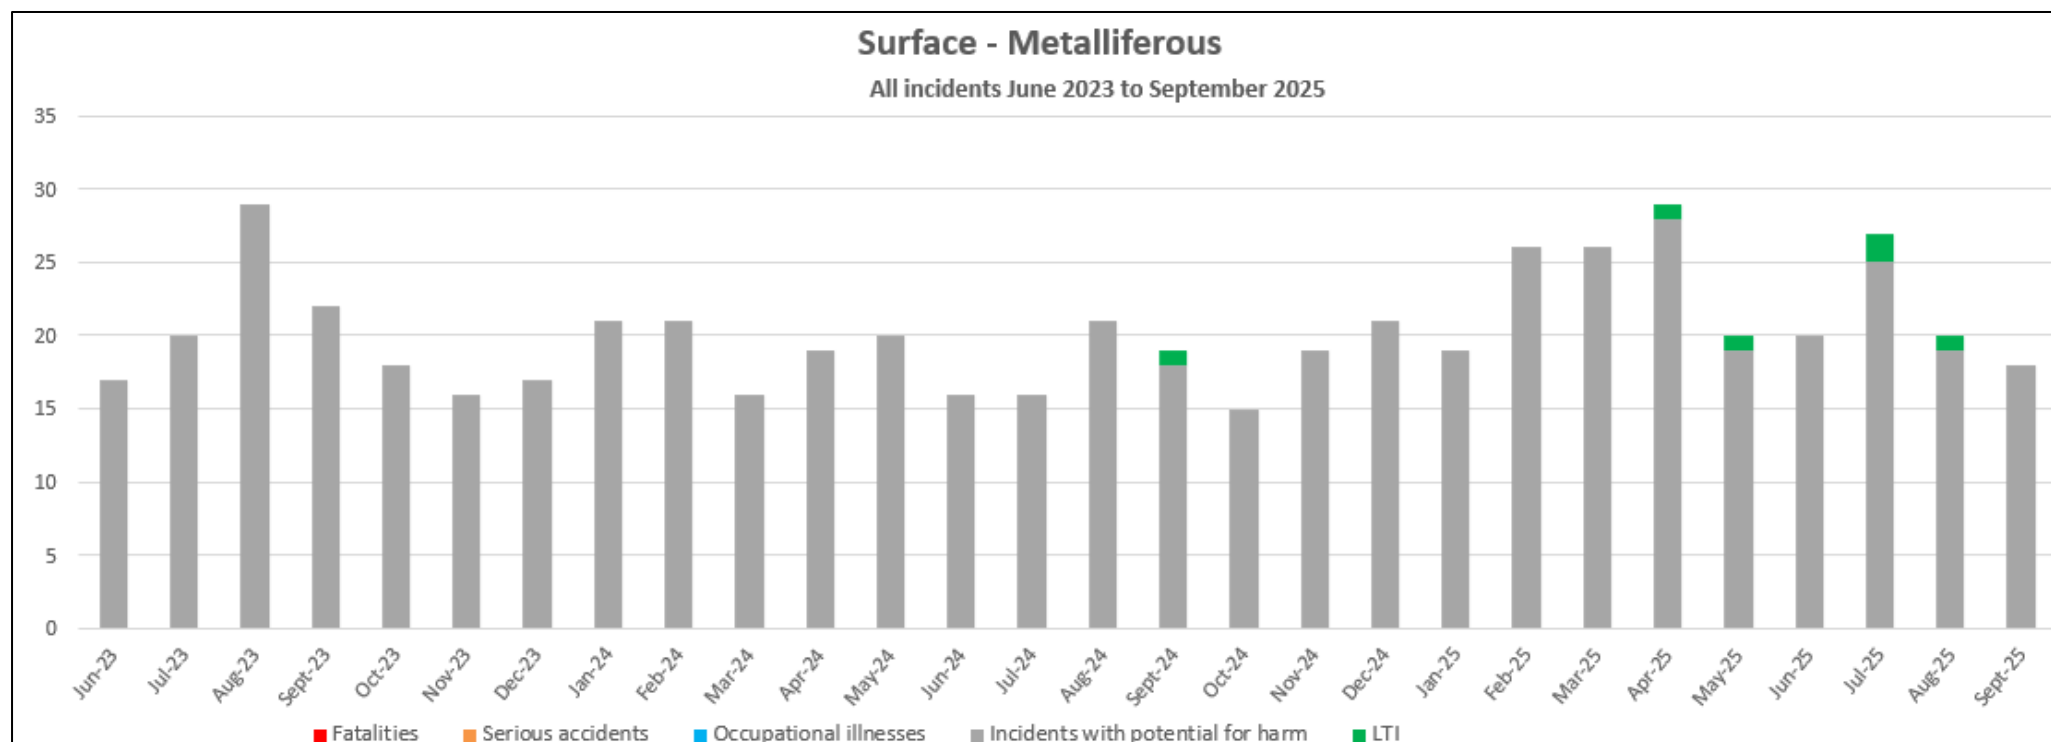

Quarries - All incidents  
July 2017 to September 2025

Quarries - All incidents  
Q3 July to September 2025

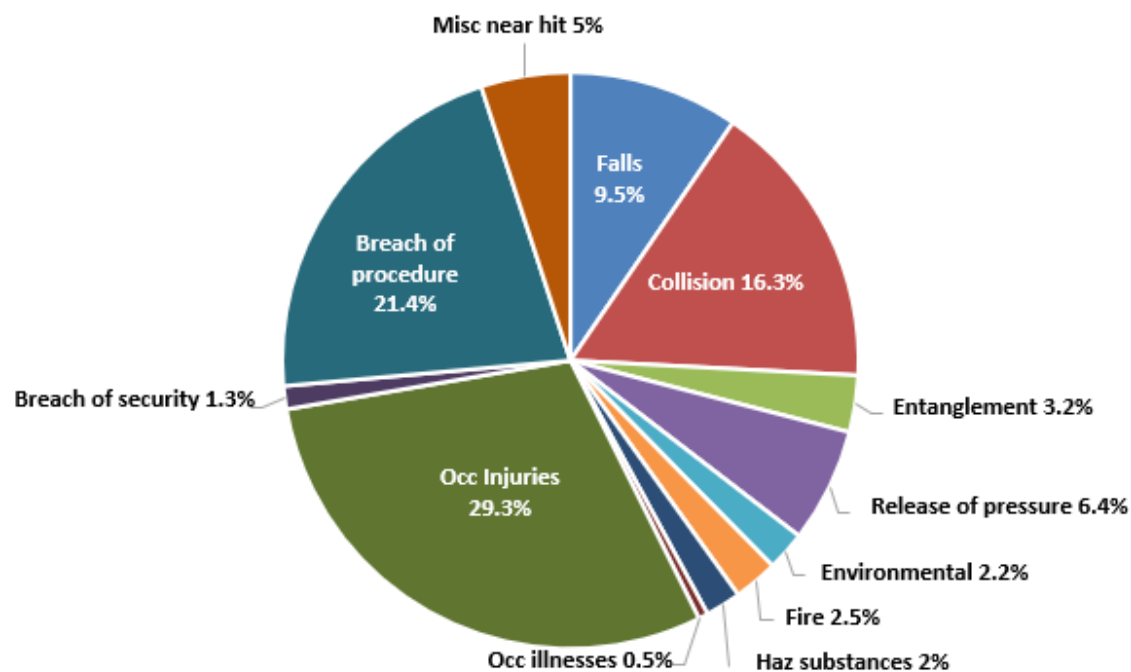

## All incidents: Surface – Metalliferous by category (including potentials/near hits) 2 years to current quarter

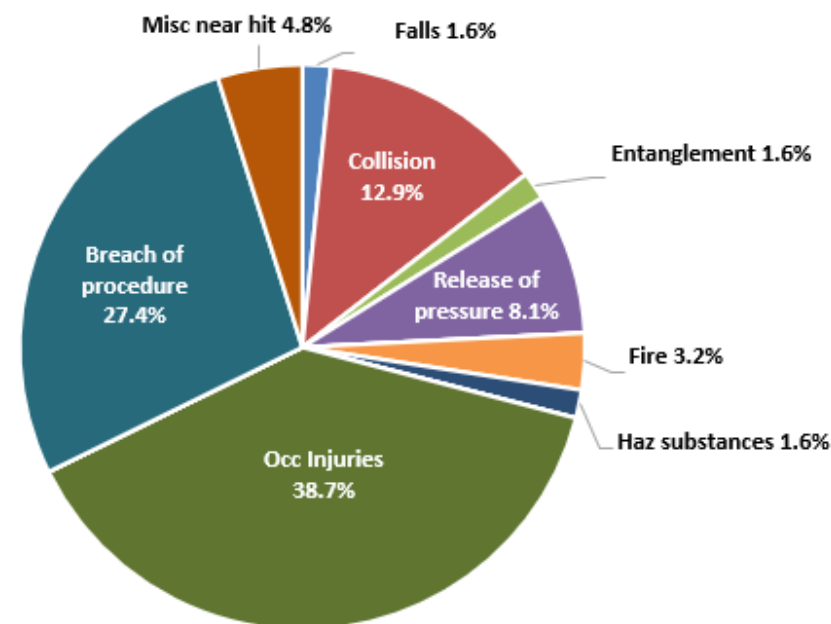

## Incident breakdown: Surface – Metalliferous by category (including potentials/near hits)

Surface - Metalliferous - All incidents  
July 2017 to September 2025

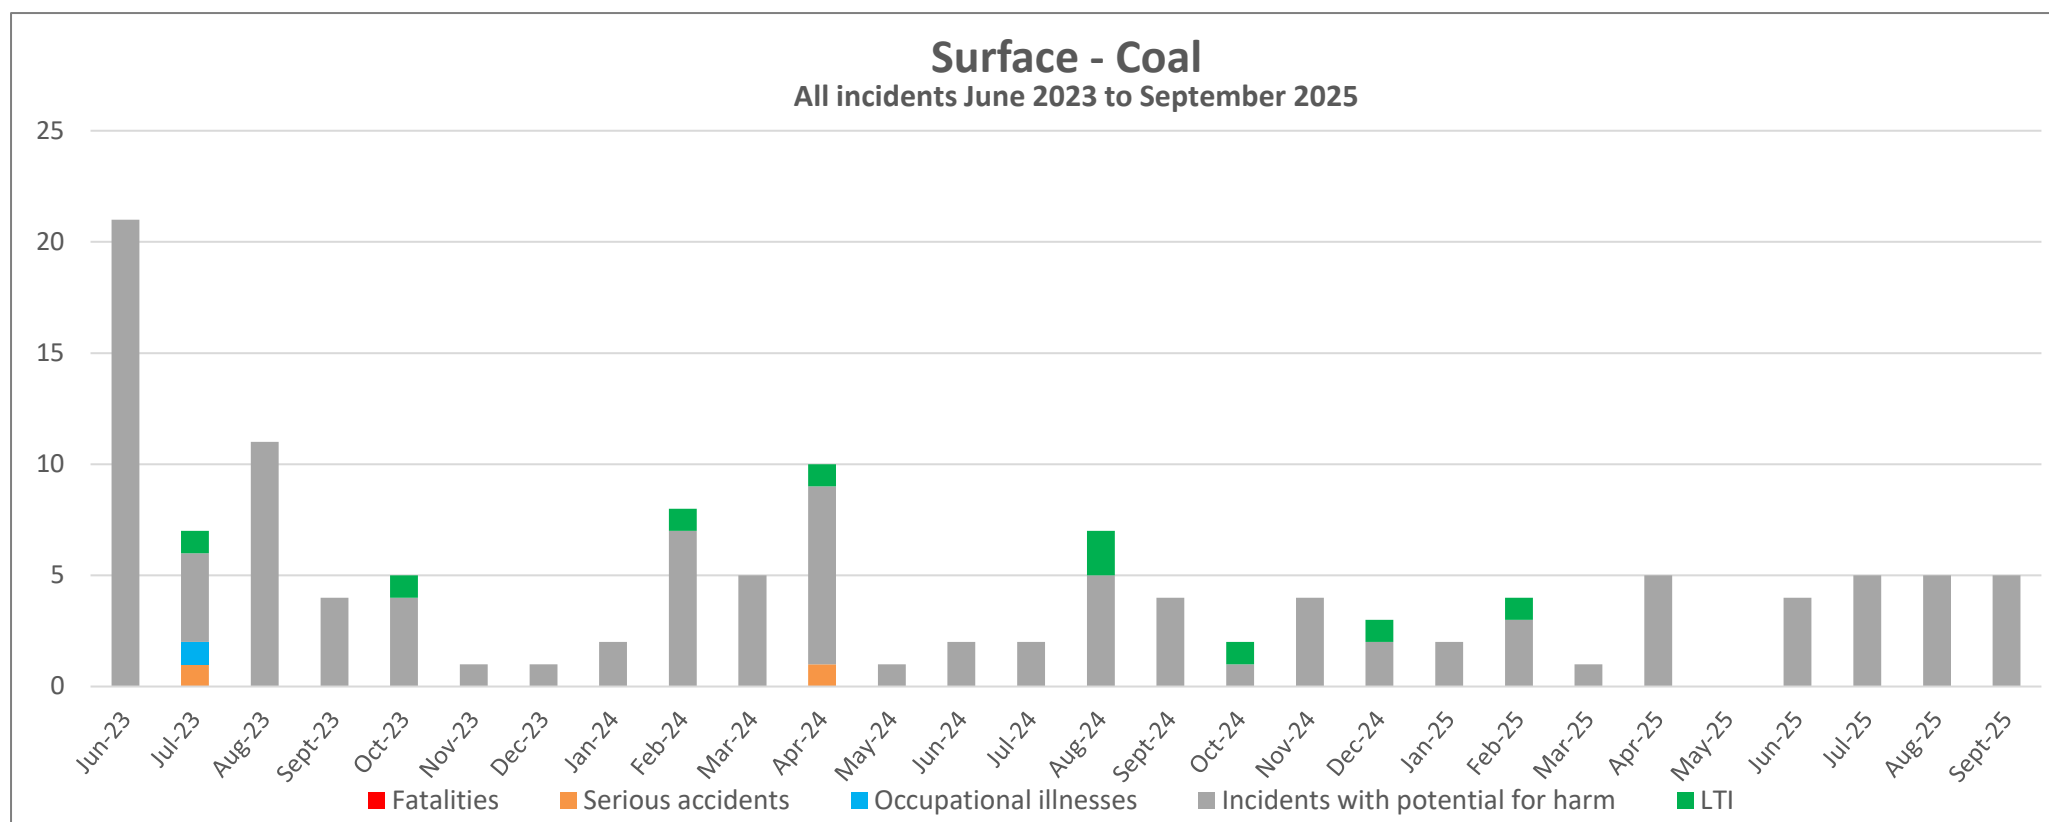

Surface - Metalliferous - All incidents  
Q3 July to September 2025

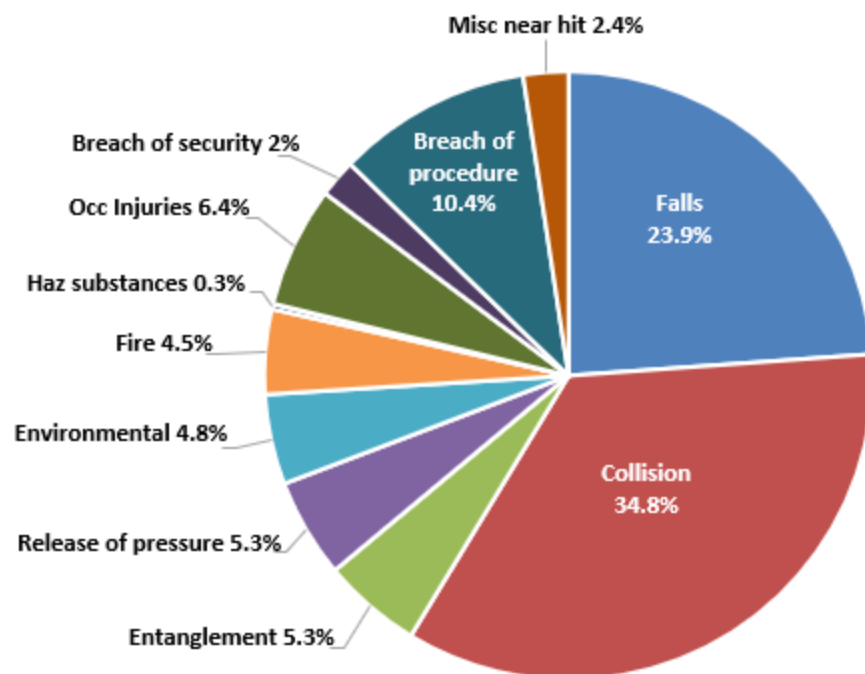

## All incidents: Surface – Coal by category (including potentials/near hits)

2 years to current quarter

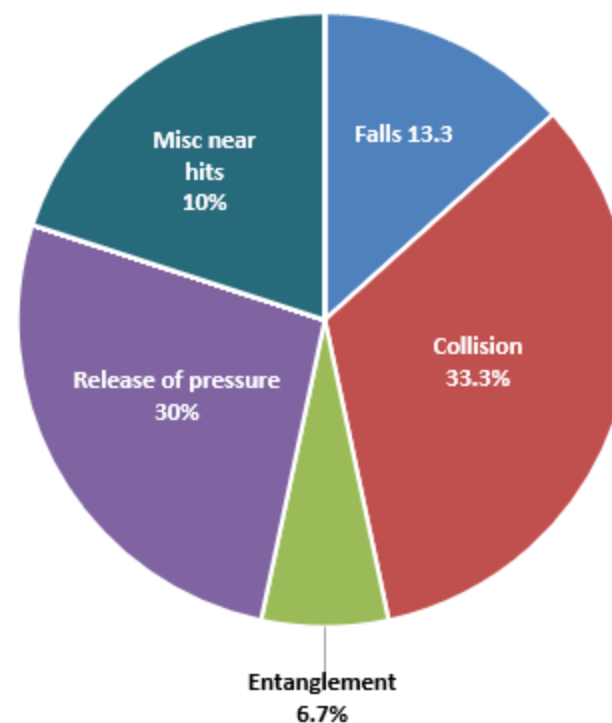

## Incident breakdown: Surface – Coal by category (including potentials/near hits)

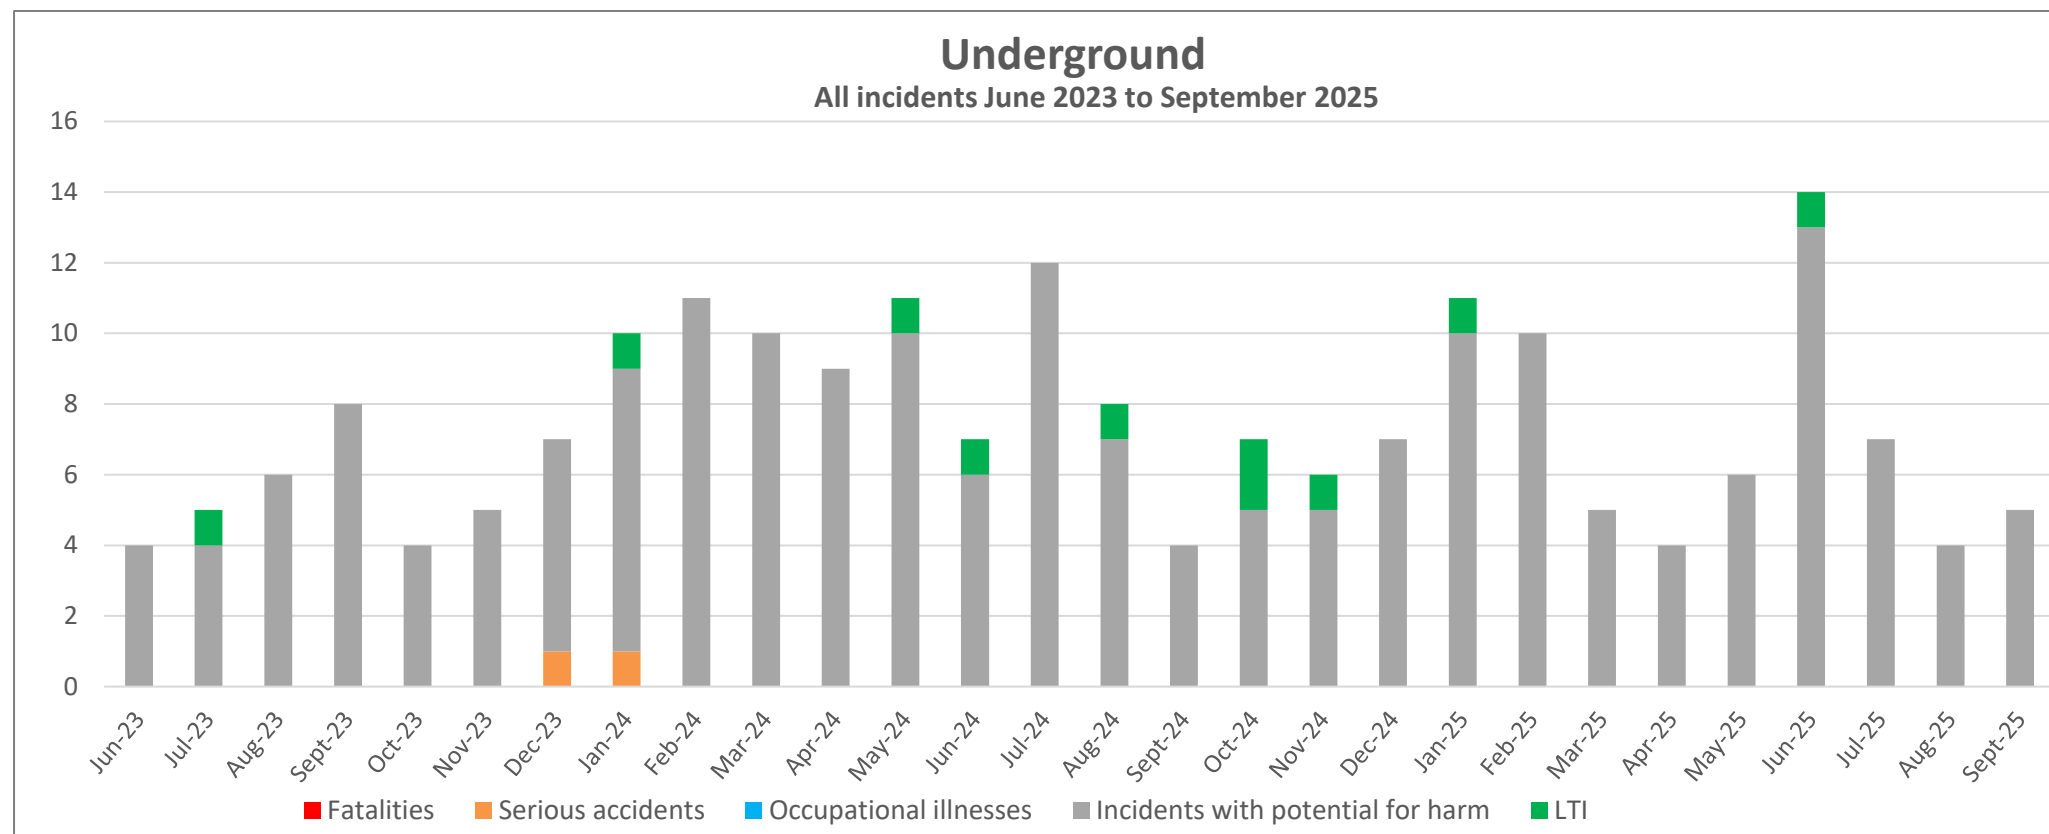

Surface - Coal - All incidents  
July 2017 to September 2025

Surface - Coal - All incidents  
Q3 July to September 2025

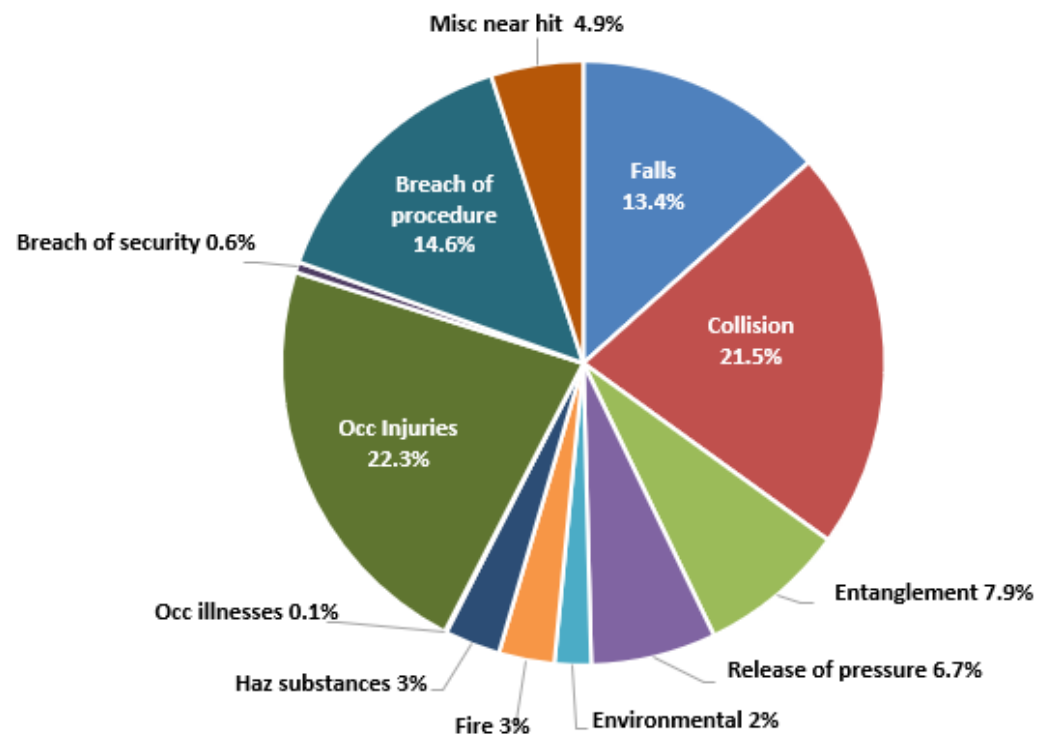

## All incidents: Underground by category (including potentials/near hits) 2 years to current quarter

## Incident breakdown: Underground by category (including potentials/near hits)

**Underground - All incidents  
July 2017 to September 2025**

**Underground - All incidents  
Q3 July to September 2025**
