

NZ Safety Alert

1 May 2020

Let's work together to keep ourselves and our workers safe

COVID-19 Hand Sanitising

WorkSafe released guidelines last week outlining the key steps necessary to minimise the risk of passing on the COVID-19 virus at work. This included **“maintaining good hygiene, particularly hand hygiene and good cough/sneeze etiquette.”**

New Zealand company Aluminium Extrusion Co. have developed a simple and robust foot operated sanitising station that is portable or can be easily screwed down for a permanent solution if required. (Picture at right.)

These units are available for order online for delivery anywhere in NZ. Details can be found at:

<https://store.alexco.co.nz/collections/covid-19-workplace-solutions/products/freestanding-sanitiser-dispenser>

Please ensure you provide adequate facilities at your site for workers so they can maintain good hygiene.

We are available to help, contact wayne@minex.org.nz if you would just like a chat. Now is a time for looking after ourselves and each other.

Know of an incident or near miss? Please share the learnings with us.
