Hazards in surface mining operations

7th December 2020

Incidents that expose workers to significant health and safety risks due to collisions, rollovers, and interaction of mobile plant has been the focus of a recent video and safety alert published by the NSW Resources Regulator. Although the severity of the outcomes of recent incidents has ranged from a near miss to minor injuries of personnel involved, the Regulator wants to remind mine operators that the potential outcome of these incidents could have resulted in severe and/or fatal injuries.
