All mines, tunnels, quarries and alluvial sites are required to complete a quarterly report for WorkSafe

[Changes to the health and safety at work \(mining operations and quarrying operations\) regulations 2016](#) came into effect on 18 July 2022. One significant change means that all mines, tunnels, quarries and alluvial sites will be required to complete an [operations quarterly report form](#) for WorkSafe every quarter. The first quarter commenced on 1st October 2022, and you will be required to complete the online quarterly return for the quarter Oct-Dec, in January 2023.

WorkSafe have prepared a step-by-step guide to assist sites in preparing their quarterly report which can be found on the [MinEx website](#).

Regards,

Wayne Scott
