A little bit about me...

My thoughts on where we need to go with Health & Safety in the workplace

Focus on fatal hazards

Effective risk management practices

Training and competency

Our main purpose is to assist in improving health and safety performance, and provide centralised industry representation, particularly to Government, in matters relating to health and safety

Our Goals

- ▶ To support the industry to achieve a 50% reduction in injuries on 2016, by 2021**
- ▶ To provide resources to the industry to enable improved health and safety performance**
- ▶ To work effectively with Government to develop appropriate and practical Regulations and Codes of Practice for the industry and to ensure these are appropriately implemented and enforced**
- ▶ To communicate effectively with other stakeholders on the industry's behalf**

How we operate

- ▶ **Funded by the quarry and mining industries**
- ▶ **Our CEO works out of the Straterra office assisted by a communications advisor, secretariat, working groups within industry and with links to other industry groups (i.e FISC)**
- ▶ **Good access through Straterra to WorkSafe, MITO, MBIE, MP's/Ministers and others**
- ▶ **Our board has representatives across quarrying, mining, tunneling, professional bodies and the union**

How MinEx can help you

- ▶ Regular advice on H&S matters as they unfold to ensure you are up-to-date with new developments and requirements.
- ▶ Opportunity for input to the WorkSafe code and guidance programme to ensure that we have fit -for purpose outcomes.
- ▶ Access to resources to assist you in developing and maintaining compliant H&S systems. Advice and assistance on training issues including COC's, Professional Development and worker training
- ▶ Regular Safety Alerts and H&S statistics as a tool to bench-mark and improve industry H&S performance

6.1 Guide to Health and Safety Training

The basic aim of health and safety training is to ensure workers understand the principles of good health, accident and incident prevention and safe behavior, so that they will apply these principles to their work. Some training needs to be specific to the task or role of the worker.

There are four areas of training and competency that are required.

- The requirements for quarry managers contained in the Health and Safety at Work (Mining Operations and Quarrying Operations) Regulations 2016¹².
- Health and safety training for quarry supervisors and workers.
- Training for specific qualifications that workers need to carry out their tasks.
- Inductions for quarry contractors and visitors.

Type of training / development	Worker	Provided by	When	Completed
Supervision New Zealand Certificate in Mining and Quarrying (Level 2)				
Employ Height Safety Equipment in the Workplace				
Wheels, Tracks and Roller Endorsements				
Renew Induction Training for Contractors				
Health and safety awareness
